

# TAXLOGIC

---

January 4, 2006

To our Taxlogic clients:

The New Year brings many changes for TaxLogic. We have enhanced the web site and added additional tools that will help lower your taxes and make tax compliance less stressful and more accurate.

If you have a rental property, check out <http://www.easyrentalproperties.biz>. This web site will handle an unlimited number of rental properties.

If you itemize deductions, you need to use <http://www.allmydeductions.com>. You will be able to input charitable contributions, medical expenses and miscellaneous deductions during the year. Don't overlook expenses you incur during the year. Now one central filing area for all your Schedule A deductions.

If you want a highly secure, web-based solution for maintaining your medical records, <http://www.allmymedicalrecords.com> is the web site for you.

All these web sites are available from the <http://www.taxlogic.com> main menu.

Corporate returns, 1120 and Sub Chapter S (1120S) returns will be filed electronically for the first time in 2006.

If you have missed a couple of prior year returns, we are still one of the few sites that do not charge a premium for doing back tax returns.

In addition, during 2006 you will be able to add information to your file so that you will not forget important information during the year.

In 2006 we will be scanning and uploading your W2's and 1099's. This means that you will have access 24/7 to prior year returns and supporting documentation.

We are providing a one-stop web portal for all your tax needs. Refer a friend, family member or business associate and we will deposit \$25 cold hard cash into your bank account.

Sincerely,

John M Carr  
Certified Public Accountant
